Hello TA!

## GitHub Documents

Code

```{r cars}
dplyr::summarise(cars, speed = mean(speed), dist = mean(dist))
```

Description: df [1 × 2]

speed <dbl>	dist <dbl>
15.4	42.98

1 row

Plots

```{r pressure, echo=FALSE}
ggplot2::ggplot(data = pressure, ggplot2::aes(x = temperature, y = pressure)) +
  ggplot2::geom_line()
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
